Introduction

The “Power Platform Shared Development Account” is a service provided by FC <OS>. It is monitored by ITG/M. Our Service offers a solution for customers to request and manage environments and licenses necessary for developing on the Power Platform. This service is designed to facilitate your access to a suite of development tools, enabling you to create, collaborate, and deploy applications efficiently.

These Terms and Conditions govern your use of the Power Platform Shared Account service and are intended to establish a clear understanding of the rules and guidelines for accessing and utilizing our resources. By registering for an account, accessing, or using the Service, you acknowledge that you have read, understood, and agree to be bound by these Terms. If you do not agree with any part of these Terms, you must not use the Service.

You must not create business critical applications on the power platform. A business critical application is one that has a direct impact on the financials and or the reputation of Mercedes- Benz.

The Full Development Shared Account can only be requested by Internal Employees of Mercedes-Benz.

We are committed to supporting your development goals and providing a high-quality service experience. We encourage you to read these Terms carefully and contact us if you have any questions or concerns.

Acceptance of Terms

By using this service, you are accepting the following conditions:

Specific Terms for the Shared Development Account:

- **Shared Development Account Request:** You will be provided with the necessary environments as requested in the DnA app by the owners (FS<OS> & ITG/M) of the Full Development Account. By default, this includes a shared development environment. Additionally, you may order a shared integration environment and a dedicated production environment as needed.
- **User Restrictions:** Each request is designated for a single team. A shared account spot is restricted to use within one specific area.

- **Cost of Shared Development Account:** The use of this shared development account incurs a cost of €200 per month, which will be billed to the customer. Please note that this cost excludes licenses and production environments, which will incur additional charges. Find the costs for these additional components on the official Social Intranet Page of the Empowerment team (Link: [Service Catalog 2024 \(Pilot\) | EmPOWERment \(corpinfra.net\)](#))
- **Cancellation Policy:** When the shared development account is no longer needed, it can be cancelled, and the associated costs will no longer apply. This cancellation policy applies only to the €200 monthly fee. The costs for licenses and production environments will continue to be charged until April of each year, as part of the True-Up process (see additional information later in this document).
- **Limited Storage:** every environment comes with 1GB storage, every license with 0.25GB. In case you exceed the available storage, extra charges may apply. 10GB additional storage have a cost of 34,20€ per month.
- **Data@Cloud:** The person ordering the shared development account in the DnA App understands and carries out the Data@Cloud process and takes care of the Data Classification, Data Protection, Cloud Risk assessment (incl. Legal and Cloud Contract Risk) and obtains relevant management signatures. Until Data@Cloud process is completed the environment must only be used for preparing the cloud infrastructure and no productive data and no productive usage are allowed.

General Terms:

- **Boundaries & Limits:** Preview Features are not allowed, you must use only generally available features within your application. Preview Features will not be allowed to be moved to the Production Environment. Exceeding the above limits can result in the application/solution moving into a quarantine state.
- **Lifecycle Management:** It is recommended to use solutions in the development environment. Applications/objects must be a part of a solution as a pre-requisite to move the solution to production.
- **Security and Data Protection:** You are responsible for the security and compliance of what you produce. This includes security, data privacy and any other required compliance activities that may be needed. You are responsible to protect the data you are authorized to access. Please assess the risks before connecting data and or applications via connectors available within the Power Platform. You are limited to the connectors allowed by the DLP policy enforced within the Full Developer environments ([EmPOWERment Center - Power Apps](#)). Financial Data: Solutions that use Financial Data (also known as ICoFR relevant processes) are not allowed on the Power Platform. Confidential data must be secured and protected when in use on the platform.
- **Operational Responsibility:** Owner is solely responsible for applications, projects, data, back-up, recovery, and for making sure applications comply with the applicable policies (Mercedes-Benz internal and Legal). Owner is responsible for maintaining, managing, updating and monitoring of all applications/solutions. Owner ensures adherence to Mercedes-Benz Policies (Including Information Security, Data Protection, and other relevant applicable policies). Any non-compliance to such policies or quality standards will be accepted and handled by Owner. Documentation: It is recommended a comprehensive documentation in the repository for it, including the (system &

software) architecture, interfaces to other systems, end user documentation and help desk guidance.

- **True Up Terms and Conditions:** If no details are submitted before the deadline of the True Up process then the previous year subscriptions and reservations will be taken as subscriptions of the new contract year. The count of license submitted during the True Up will be updated as bookings for our account at start of May only. Once the True Up is submitted, the count of licenses or the services cannot be changed until the True Up for next contract year. Since the True Up process is conducted in Feb/Mar, any reservations placed after the TrueUp will last only till end of April. The count submitted in the True Up will be put in place from May.

Modification of Terms

Our "Power Platform Shared Account" service operates in alignment with the policies and terms set by the "Empowerment Team." ([Full Developer Account \(sharepoint.com\)](https://sharepoint.com)): As such, any changes to their terms and conditions may necessitate corresponding adjustments to our Service's Terms and Conditions.

We reserve the right to modify or replace these Terms at any time as we deem necessary to reflect changes in the underlying terms provided by the "Empowerment Team" or due to legal, technical, or business developments. When we make changes to the Terms, we will make every reasonable effort to notify you of such changes.

The notification of modifications to our Terms will occur following our regular true-up process. During this process, we will provide you with a summary of the significant changes and the effective date of the new terms. Your continued use of the Service after the true-up process and notification of changes to the Terms will constitute your acceptance of the revised Terms.

The licenses and environments are assumed for a duration of 1 year (from May to end of April). During the year they can be increased, but not reduced. In the true-up process, we can reduce them (which is done in February/March). If there are storage costs, they will be applied.
